Round Tea Bag Packing Machine

STB-10R

Round Tea Bag Packing Machine STB-10R Details

Technical Features

STB-10R round tea bag packing is an advanced tea bag packing machine. It's using paper filter as the packaging material, which is specially designed to make round tea bags.

Loaded with reel of paper filter packaging materials, it can automatically make round tea bags out of rolled filter paper packaging material.

PLC controller, HMI touch panel, it's easy to operate and seldom human interfere it. The packing speed is as quick as 30 bags/min.

Advantages

- Suitable for granular tea, coffee, food, medicine packaging
- Specially design for round tea bags packaging

- Fully automatic round tea bag packing machine
- Able to complete round tea bag making, tea filling, tea bag sealing, and conveying out
- Touch panel (HMI) operation, PLC control
- Motor driving to control and adjust the filter paper bag size
- Compatible with counting device

Technical Parameters

Modal	STB-10R
Speed	30 bags/min.
Max. Dosage	2~10ml
Filter Paper Width	125mm, 140mm
Filter Bag Size	Max. ϕ 70mm
Power supply	AC 220V 50HZ (Custom-made available)
Power Load	2.2kw
Machine Net Weight	350KG
Compressed Air Pressure	0.6bar
Machine Dimension	900(L) \times 700(W) \times 1500mm(H)
